FlexiOffice

Workspace Solutions Simplified

In today's dynamic business landscape, companies with multiple offices and remote teams face a significant challenge in efficiently managing employee attendance and seat allocation.

With the rise of hybrid working models, where employees seamlessly transition between office locations and remote work, the absence of a robust mechanism for attendance tracking and seat allocation becomes a pressing concern.

It is imperative to have a comprehensive solution that aims to address these challenges by implementing a state-of-the-art attendance tracking and seat allocation system designed for the modern, hybrid workplace.

About FlexiOffice

FlexiOffice by Mikro Grafeio is a platform for utilisation of distributed workspaces that helps businesses access flexible and secure workspaces.

It allows companies to add their own spaces, creating a network of work locations for employees throughout India.

With smart workspaces and useful services, FlexiOffice makes work easier, tracks usage, and boosts productivity.

WHY FlexiOffice?

Increased Efficiency

Streamline workforce management processes, reducing administrative overhead and ensuring a more efficient use of resources.

Cost-Efficient Operations

Reduce overheads, eliminate the need for significant investments in office infrastructure, and pay only for utilized workspace and services.

Adaptability

Seamlessly adapt to the changing dynamics of the modern workplace, providing a solution that supports hybrid working models.

Employee Satisfaction

Enhance the employee experience by providing a flexible and user-friendly system for managing attendance and seat allocations hasslefree.

Join us to revolutionize workforce management in the hybrid era!
